Relevant Coursework: Computer Information Systems (Excel-focused) – A, Microeconomics – A, Macroeconomics – A, Introduction to Finance – A

Certifications: Microsoft Excel, Microsoft Access

EXPERIENCE

Freelance Web Designer & AI Solutions Builder — Remote / Boone, NC

2024 – Present

- Design, build, and redesign responsive websites for local service businesses, focusing on clear branding, mobile-first layouts, and conversion-oriented landing pages.
- Use Claude Code and modern AI tooling to rapidly prototype, edit, and ship client sites, including quote/contact forms, photo galleries, service pages, and branded hero sections.
- Configure GoHighLevel CRM workflows — pipelines, automated follow-ups, missed-call text-back, and lead capture forms — to help small businesses respond to leads faster and reduce drop-off.
- Identify local businesses without a strong online presence through targeted outreach, then scope and pitch website + automation packages tailored to each owner's goals.
- Communicate directly with business owners to gather requirements, present design options, and translate feedback into iterative site improvements.

Bartaco — Chapel Hill, NC | Server

May 2023 – Present

- Manage \$900–\$1,100 in revenue per shift in a high-volume environment while maintaining a 20.78% average tip rate.
- Build repeat-customer relationships through attentive service, real-time problem solving, and clear coordination with kitchen and bar staff.

Rocket Car Wash — Chapel Hill, NC | Sales / Customer Service Associate

May 2022 – August 2023

- Processed 80–120 transactions per shift and supported \$2,000–\$3,500 in daily sales while consistently pitching monthly wash memberships at the point of sale.
- Practiced consultative selling — qualifying customers, explaining value, and handling objections — to convert one-time visitors into recurring members.
- Strengthened core sales skills in upselling, retention, and high-volume customer interaction that now carry into client-facing freelance work.

PROJECTS

Local Business Website & Lead-Gen System — Freelance

- Built a responsive Next.js + Tailwind site for a local cleaning business with branded hero, services overview, gallery, and an embedded quote form wired to a CRM pipeline.
- Connected the site to GoHighLevel for automated lead intake, follow-up sequences, and centralized client communication, shortening response time to new inquiries.
- Iterated on copy, layout, and calls-to-action based on owner feedback and basic conversion review.

NFL Receiver Motion & Decoy Classification — Kaggle

- Contributed to a predictive model classifying pre-snap receiver motion as decoy vs. primary target using NFL play and tracking data.
- Performed data preprocessing, exploratory analysis, and model evaluation; framed findings around probability, efficiency, and strategic decision-making.

Expected Goals (xG) Predictive Model — Research Assistant

- Assisted a professor in developing a soccer xG model estimating scoring probability from shot-level data.
- Cleaned, engineered, and analyzed datasets in Python (pandas, NumPy); built Excel tables and visualizations to translate model output into decision-focused summaries.

SKILLS & TOOLS

AI & Automation: Claude Code, prompt engineering, AI-assisted web development, workflow automation

Web & Design: Responsive web design, Next.js, Tailwind CSS, HTML/CSS basics, UI/UX fundamentals, conversion-focused layouts
